

MEAC Prioritization for 2022

What's next?...Questions to think about in advance of November 15, 2021 meeting....

1. How does MEAC see its role changing, if at all, based on the changing realities...should focus remain on net zero goals or should MEAC's focus shift to include issues regarding resilience and climate adaptation?
2. How can MEAC develop/improve its relationship with the schools in order to address school's pivotal role in advancing net zero action plan?
3. How does MEAC better inject itself into the "landlord tenant relationships" in the city for the specific purpose of reducing residential fossil fuel emissions?...should this be a focus point for MEAC or should MEAC's focus be on municipal functions?
4. Transportation is the greatest challenge to city's net zero goals...how can MEAC best affect change in this area?...again, should MEAC's focus be on municipal or residential transport issues or both?
5. How can MEAC best expand and use the Green Energy Revolving Loan Fund?
6. How does MEAC view its role vis a vis the Net Zero Action Plan?
