

Our city's growth, prosperity, aging infrastructures and roads, water quality, recreational expansion, public communication, and preservation are just some of the important pressing issues we face.

I want to help address these issues in a creative and open manner with a logical and intelligent approach. I want to strongly encourage a reform to our city governance and policies.

With public awareness/ engagement, community involvement and dedication, the possibilities are endless, because we care

It would be an honor in service to represent my district and to do my best to be a trusted voice to the community on the city council.

Focus:

Reform City Governance

Positive Change

Realistic Action / Results/ Responsible Budgeting

Creative Planning, Improvement of Public Communication, Public Polling, Surveys

City Sustainability, Economic Development, Community Development

Aging Infrastructure, Environment
